“A built environment planned, constructed and operated within planetary boundaries to deliver environmental justice and to support the flourishing of all life for all time.”

As our work grows to meet the challenge of the emergency, AD needs to continue building our funding and engagement.

Together, we can achieve more

As a volunteer-led initiative and registered charity, we make the most use of funds to deliver our successes. Steering Group and working group members freely donate considerable time and expertise, and we welcome partnership opportunities for greater impact.

Our freelance Manager and Communications Officer are part-time. We bring in additional services as needed. Additional costs include our website & email accounts, events, insurance etc.

Growing our resources means we can deliver more through our dual approach to building agency and change:

- ★ **Supporting and encouraging signatories on pathways to deliver their declarations.**
- ★ **Demonstrating where leaders can change the systems behind the crisis.**
